PORTFOLIO

EDUCATION

University of Connecticut | Analytics and Information Management (B.S. in progress) Expected May 2029
Concentration: Artificial Intelligence and App Development

PROFESSIONAL EXPERIENCE

ADM8 (CO-OP) | Lead Product Engineer Sep 2026 - Present

- Led the hands-on rebuild of ADM8's V2 AI creative platform, turning a fragmented MVP into a coherent workflow for users to develop and produce creative.
- Owned product direction and roadmap decisions for the rebuild, setting feature priorities, defining requirements, and translating customer feedback into UX and engineering changes.
- Built the guided brief, storyboard review, and generation workflow in Next.js, React, and TypeScript, giving users editable outputs and clear approval steps before production.
- Aligned V2 priorities with the founder and executive stakeholders during an approximately $400,000 financing round (pending); earned positive investor feedback on the rebuild.
- Built AI production workflows that reduced team time investment by 35%; used client delivery requirements to guide improvements and create content for European brands.

CapitalCollab (Internship) | Product Engineer & Business Development Dec 2025 - Present

- Co-developed an internal web app replacing 15 years of Salesforce workflows, gathering requirements directly from sales users and reducing monthly platform costs from $1,200 to $100 (approximately 92%).
- Built automations that generated $35,000+ in revenue and email/GTM infrastructure reaching 45,000+ U.S. business owners.
- Connected borrower intake, sales, and underwriting through front-end sites and automation; worked directly with 15 business owners to identify suitable loan products and private credit opportunities.

ENTREPRENEURIAL EXPERIENCE

Viralinn | Founder & Product Engineer Jan 2026 - Present

- Founded and took an AI content platform from discovery to launch, owning MVP scope, Figma UX, and full-stack development across the marketing site, onboarding, and authenticated app.
- Integrated image, video, voice, and music APIs; built an MCP server that lets AI agents turn a creative brief into ad assets using the platform.
- Prioritize improvements through onboarding calls, customer feedback, and funnel drop-offs; acquired paying customers organically without paid acquisition.
- Delivered AI marketing assets for 25+ brands; helped a Swedish app company with 4M+ downloads launch a UK campaign with 35%+ lower cost per click than its typical campaigns.

INDEPENDENT PROJECTS

Surplus | Founder & Product Engineer

- Built and launched a native SwiftUI weight-gain coaching app on the App Store, owning product scope, UX, and a Convex backend for personalized onboarding, meal logging, and progress tracking.
- Paired AI coaching with deterministic nutrition and progress logic to keep meal and goal updates consistent; built the web funnel and launch analytics to guide iteration.

Studios | Founder & Developer

- Identified a retention blind spot for early-stage founders and built a churn-prevention product that flags at-risk customers before they cancel.
- Designed and implemented customer risk scoring and product-event tracking with Next.js and Convex.

CAMPUS AND COMMUNITY LEADERSHIP

Connect AI | Student Team Lead

- Lead a UConn student team building AI solutions for enterprise and local business clients, applying hands-on experience from founding and developing AI products.

Found[ERS] | Founder & Executive Director 2025 - Present

- Grew a student entrepreneurship community to 50 NYC members, connected founders with mentors, and built the organization's website.
- Led planning and delivery of the Founder & Pitch Summit in May 2026, bringing together 35+ entrepreneurs and VC participants from across the U.S. and awarding $500 to the top startup.

Personal Brand: Generated 60,000+ cross-platform views through personal-brand experiments that converted creative marketing work into leads and customers for products and tools.

SKILLS

Product & Project Delivery: Discovery, requirements, MVP scoping, roadmaps, prioritization, stakeholder alignment, delivery planning, UX, system design, API integration, testing, release validation, documentation

Development: TypeScript, JavaScript, Python, Swift/SwiftUI, React, Next.js, React Native, Node.js, Convex, REST APIs, webhooks, Git

AI & Tools: LLM integration, MCP servers, workflow automation, Figma, GitHub, Vercel, Xcode, PostHog, Claude Code
